EDUCATION

University of California Irvine

Irvine, CA

B.S. Informatics, Health Informatics Specialization | **GPA: 3.66**

Sep. 2023 – June 2027

- **Relevant Coursework:** Human-Computer Interaction, User Interaction Software, Information Visualization, Designing for IoT, Software Design, Requirements Analysis & Engineering

EXPERIENCE

AI Agent Engineer Intern

Jun. 2026 – Present

OC Sports & Entertainment – OC VIBE

Orange, CA

- Grew platform adoption **36% (64 to 87 users)** by leading staff user research on workflow gaps and usability pain points, then prioritizing and shipping an interface redesign
- Ran competitive analysis of the ChatGPT and Claude UIs and anchored the redesign in that familiarity, sketching to wireframe the UI and user screen flows once research surfaced the need for a projects section
- Iterated on the interface with **Claude Code CLI** and **React**, settling on a UI that matched the company's design template

PHIT Intern

Jan. 2026 – Jun. 2026

UCI PHIT – Rady Children's

Orange, CA

- Led scoping and design of an AI-driven pediatric health platform across a cross functional intern team, running weekly stakeholder reviews and iterating deliverables from feedback
- Designed an **AI-powered workout experience** grounded in a RAG pipeline over peer reviewed clinical evidence, keeping every AI health suggestion safe and usable for teen users
- Used AI dev tools alongside **Figma** to rapidly generate and test high-fidelity UI components, tuning an approachable, energetic experience to teenage psychology and tech comfort

Healthcare Administration Intern

Jun. 2025 – Aug. 2025

Kaiser Permanente

Harbor City, CA

- Recruited and interviewed **12+ stakeholders**, affinity mapping in **FigJam** to surface a key pain point
- Ran competitive analysis and prototyped a patient-facing dashboard in **Figma** addressing ambiguous emergency-room wait times, iterating toward a clear user centered solution
- Presented the end-to-end product concept to a panel of hospital board members and clinicians, fielding cross functional scrutiny and defending design decisions

PROJECTS

FASTer A UI/UX Redesign | *Research, Prototyping, Wireframing* | [Devpost](#)

Track Winner IrvineHacks 2026 – First American Best AI Usage in Real Estate

- Ran user research with First American stakeholders to reverse-engineer the FAST system and its pain points
- Translated research into **high-fidelity Figma prototypes**, using Gemini CLI and Figma Make to accelerate frontend generation and validate user flows
- Designed structured UI card states (PASS/WARNING/FAIL) surfacing AI validation results, reducing user error and streamlining document review

Codec Club Hub | *Interface Design, Semantic Search, Embeddings* | [View Site](#)

Nov. 2025 – Current

- Scoped and shipped a **0-to-1 semantic search experience** covering **100+ university organizations**, designing a natural language flow that matches students to clubs from plain descriptions of their hobbies and career interests
- Designed the search and results experience, turning AI matching (Sentence-Transformers embeddings in ChromaDB) into an intuitive interface that surfaces relevant clubs in real time
- Built the working Flask prototype to validate the concept with real users, iterating from their feedback

TECHNICAL SKILLS

Design & Prototyping: Figma, FigJam, Figma Make, Wireframing, Prototyping, User Research, Affinity Mapping

AI Tools: Claude Code, Gemini CLI, Codex CLI, RAG Pipelines, LLM Prompting

Languages & Dev: Python, SQL, JavaScript, HTML/CSS, Git, Docker

Certifications: Python for Data Science & AI Development, IBM Data Analyst Professional Certificate
